

Features and Benefits

Proven. Weather-based irrigation management.

WeatherTRAK ET plus reliably delivers sustained savings and optimal plant health by eliminating overwatering. With its unique combination of precise irrigation scheduling, daily, local ET updates and proactive customer service, *WeatherTRAK* sets the standard for smart controllers.

Rigorous field testing and study after study prove that *WeatherTRAK* reliably conserves water and reduces runoff:

- ***WeatherTRAK* converts 95% of potential water savings**
Los Angeles Department of Water and Power
- ***WeatherTRAK* reduces water use by up to 59%**
Santa Barbara Water District
- ***WeatherTRAK* achieves 97% customer satisfaction**
Irvine Ranch Water District
- ***WeatherTRAK* reduces non-point source runoff pollution by as much as 71%**
*Metropolitan Water District of Orange County,
U.S. Bureau of Water Reclamation,
Cal/EPA and additional agencies*

WeatherTRAK customers, who include leading builders, contractors, cities, homeowners and property managers, achieve annual water **savings of hundreds of dollars per controller**. A fast growing number of **rebate programs** accelerate savings by covering up to half of the controller's cost.

With *WeatherTRAK*, our customers:

- **Reduce water bills**
- **Protect landscape and hardscape investments**
- **Increase efficiency through automation**
- **Achieve affordable, sustainable water management**
- **Increase customer satisfaction**
- **Realize rapid ROI**

"WeatherTRAK is the best product on the shelf. My customers have reduced water use by 33%."

John Seaver,
Just Sprinklers,
Albuquerque, NM

WeatherTRAK Scheduling Engine™

Automates Accurate Irrigation

Featuring integrated *WeatherTRAK Scheduling Engine* software, the *ET plus* controller automates scientifically-based irrigation schedules. Select landscape-specific parameters, such as plant, soil, slope and sprinkler type, to quickly establish optimal irrigation schedules that match the true water budget for each zone of your landscape. Gain control over water windows, water days and manual watering with *WeatherTRAK*.

- Features pre-set and two customizable plant settings
- Boosts efficiency with one-touch copy program button and system monitoring
- Automates cycle and soak times with soil and slope settings

WeatherTRAK ET Everywhere™ Service

Ensures Accurate Weather Updates

WeatherTRAK ET Everywhere delivers local weather-based ET updates via a wireless communication network everyday, automatically adjusting irrigation in accordance with changing weather. Data is collected from 14,000+ weather

stations across the U.S. including the National Oceanic and Atmospheric Administration (NOAA) network, state and county networks and private weather stations. Proven scientific modeling techniques validate local weather down to one square kilometer before ET updates are transmitted to *ET plus* controllers.

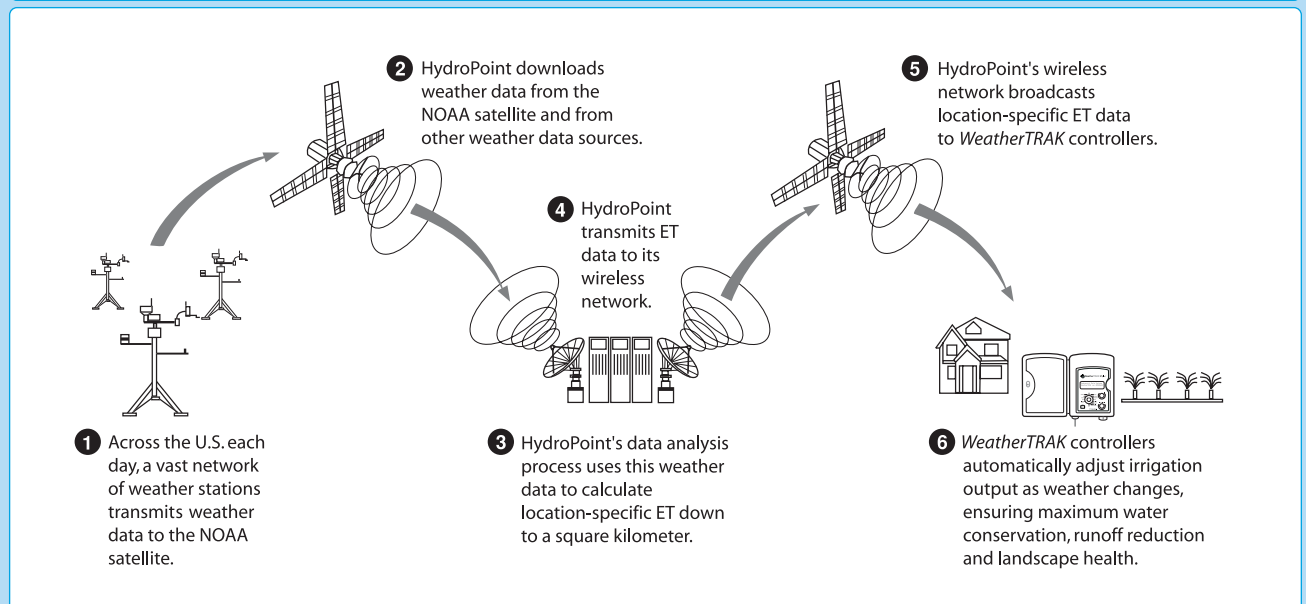

- Eliminates reliance on historical data
- Triggers dynamic irrigation adjustments based on the local, daily weather
- Accounts for all the variables that affect ET, including humidity, solar radiation, temperature and wind
- Removes hassle, risk and cost of single local sensors

WeatherTRAK Customer Service

Provides Customized Expertise

Proactive support from our trained experts is a key component of *WeatherTRAK* weather-based irrigation management because satisfied customers are our first priority. Our horticulture and irrigation experts ensure that you always enjoy peak performance from *WeatherTRAK ET plus*. Help is just a phone call or mouse click away.

WeatherTRAK ET Everywhere: Local weather data delivered daily to WeatherTRAK controllers across the U.S.

With a nationwide network of 14,000+ weather stations and data accuracy to one square kilometer, *WeatherTRAK ET Everywhere* pinpoints the weather in your yard.
